LOT 249 - Mini Skid-Steer Hydraulic Skeleton Grapple Bucket (New/Unused)

Description

Mini Skid-Steer Hydraulic Skeleton Grapple Bucket – Efficient Sorting, Grabbing, and Cleanup

The **Mini Skid-Steer Hydraulic Skeleton Grapple Bucket** is a high-performance attachment designed for handling loose and bulky materials while allowing smaller debris, dirt, or gravel to fall through. Featuring open ribbed tines and dual hydraulic grapple arms, this bucket provides powerful gripping and excellent visibility—making it ideal for precise work in tight or cluttered areas.

Key Uses and Benefits:

- **Sorting Debris:** Separate and lift larger materials like rocks, branches, or scrap while sifting out finer material.
 - **Land Clearing & Brush Removal:** Grab and remove overgrowth, logs, and brush efficiently.
 - **Construction Cleanup:** Clear job sites of construction debris, broken concrete, and loose material.
 - **Recycling & Scrap Handling:** Pick up and move irregular metal or waste while leaving dust and small particles behind.
 - **Agricultural Tasks:** Clean livestock pens, manage hay or manure, and sort compost materials.
-

Perfect for landscapers, property managers, and contractors, this hydraulic skeleton grapple bucket maximizes productivity on mini skid steers by combining selective loading with strong gripping power—all in a compact, maneuverable design.

- Working Width: 44in
- Max Opening: 47in
- Closing Force: 15KN

Quantity: 1
