LOT 89 - Mini-Excavator Heavy Duty Hydraulic Breaker Kit (New/Unused)

Description

Mini-Excavator Heavy Duty Hydraulic Breaker Kit – Precision Demolition for Tough Materials

The **Mini-Excavator Heavy Duty Hydraulic Breaker Kit** is a powerful demolition attachment designed to break through concrete, asphalt, rock, and other hard materials with speed and precision. Engineered for use with mini excavators, this hydraulic hammer uses the machine's hydraulic system to deliver high-impact force, making it ideal for controlled demolition, trenching, and site prep work in confined or urban areas.

Key Uses and Benefits:

- Break up concrete slabs, sidewalks, driveways, and footings

- Demolish retaining walls, curbs, or old structures
- Perform rock breaking in trenching and utility applications
- Prepare hard ground surfaces for excavation or construction
- Ideal for construction, demolition, roadwork, and landscaping projects

Built for durability and performance. It's a must-have tool for contractors and operators who need compact yet serious breaking power on the jobsite.

Fits 1-3 Ton Mini Excavator, Pin Diameter: 1in
