LOT 327 - Skid-Steer 72in Hydraulic Skeleton Grapple Bucket (New/Unused)

Description

Skid Steer Hydraulic Skeleton Grapple Bucket – Powerful Sorting and Debris Handling

A **Skid Steer Hydraulic Skeleton Grapple Bucket** is a rugged, high-efficiency attachment designed for separating, lifting, and transporting bulky materials while allowing dirt, small rocks, and finer debris to fall through. Featuring open ribbed tines and hydraulic grapple arms, it provides strong clamping force and excellent visibility, making it ideal for tough cleanup and sorting tasks on farms, job sites, and demolition areas.

Key Uses and Benefits:

- Clear brush, roots, logs, and construction debris while leaving soil behind
- Sort and transport scrap metal, rocks, and bulky waste
- Clean up demolition sites with less mess and more control

- Remove storm debris or landscape materials efficiently
- Handle agricultural waste, compost, or manure without scooping excess soil

With its combination of hydraulic gripping power and open-frame design, the Skeleton Grapple Bucket is a must-have for anyone needing precise control when handling loose or uneven materials on rough terrain.

Working Width: 72in

Max Opening: 47in

Closing Force: 15KN

Quantity: 1
