LOT 333 - Skid Steer 72in Hydraulic Grapple (New/Unused)

Description

Skid Steer Hydraulic Grapple – Secure Lifting and Material Control

A **Skid Steer Hydraulic Grapple** is a powerful attachment designed for grabbing, lifting, and transporting bulky or irregularly shaped materials. Powered by hydraulic cylinders, the grapple arms open and close with force and precision, making it ideal for heavy-duty tasks in land clearing, demolition, construction, and agricultural work.

Key Uses and Benefits:

- Securely handle logs, brush, debris, and scrap materials
- Remove stumps, rocks, and storm-damaged trees with ease
- Clean up demolition sites by lifting broken concrete, metal, and rubble
- Transport fencing, pipe, hay bales, or other large items on farms and ranches

- Improve safety and efficiency by reducing the need for manual lifting or chaining loads

Designed to work with the full lifting and maneuvering power of your skid steer, a hydraulic grapple greatly expands your machine's capabilities—turning it into a highly effective tool for material handling in rugged environments.
